

WHAT DREAMS CAN BECOME -
SMART START SYSTEM

Let's move on to your Social Media!

Because you can actually run your business with just social media while you are building your website.

As you are setting these up - I would make sure that they are all under your name. This way....if something changes and you have to rebrand- you don't have to change all of your links and social media and stuff.

First Set up your Canva.com account. You will need this for a lot of graphics!

Set up your Facebook Fan Page (by the way- I have some tutorials that are only in my Busy Online Moms Facebook Group and this is one of them! Join here to check it out)

Next set up your Facebook Fan Cover

Now set up your Pinterest

Instagram. That's it for now.
